

# Yadkin County Soybean Field Day

**Date:** Thursday, September 21, 2006

**Location:** Mark and Wayne Smitherman's Farm  
3513 Forbush Road  
East Bend, N. C.

**Time:** 5:00 p.m.

This year we have some very exciting research in our soybean plots and lots of new information. In addition to the normal variety test plot, there is also a population test plot. The population plot looks at planting populations in 15 and 30 inch rows with plant populations from 25, 000 to 200,000. We will also address weed control, fertility, fungicides, and talk about full season versus double crop beans.

We offer 1 hour of pesticide recertification credit in categories N, O, D, and X. For registration and further details contact Joshua Stamper at (336) 679-2061
